

EVO ADVANTAGE eTurbo

Sustainability

IMPROVED FUEL EFFICIENCY TO REDUCE GREENHOUSE GAS

220kW generator built into turbocharger to power traction motor #3 and reduce fuel consumption on High Pressure Common Rail EVO engines.

The existing EVO platform is already recognized as the most fuel-efficient heavy haul freight locomotive. By leveraging the EVO Advantage platform, this efficiency is further enhanced, resulting in a **~5% boost in fuel efficiency**. This improvement is achieved through full system integration and packaging with advanced power electronics, designed for seamless installation during engine overhaul events.

COMING SOON..

Production available 3Q 2025.
